

Comindware®  
Tracker®

# Maximize your Microsoft Investment with Comindware

## Initiate and track Comindware Workflow processes in SharePoint

Your team is already using SharePoint and you chose Comindware to track your IT, G&A, HR, C&P or any other processes. With Comindware Workflow for SharePoint, your people can stay in this familiar environment and initiate their requests directly from SharePoint sites and applications.

Comindware' easy-to-use graphical Workflow engine allows creating workflows and applications for SharePoint visually with no coding required.

Comindware is easy to get started with – no complex installations inside SharePoint and no interruption of ongoing processes.

## Comindware Workflow for SharePoint

- Build Workflows and business applications in SharePoint with a graphical Workflow Builder that requires no coding. Start with lists and libraries; then use Comindware Workflow to quickly build SharePoint forms and application logic.
- Initiate requests and processes right in SharePoint and track their status in real-time.
- Automatically generate Tasks for execution with priorities and deadlines -- not just an email containing a link back to SharePoint.
- Use Comindware's powerful Workflow Engine behind your SharePoint interface to build business applications that run on Comindware's enterprise-level Workflow Engine. Critical processes won't compete for SharePoint server resources, and you will have the control you need.
- Get real-time visibility on all your team processes and Tasks with Comindware graphical reporting tools.

## Features & Benefits

### Key Features & Benefits

- Super easy to create and make changes to workflows
- Workflows automatically generate Outlook Tasks, not just links back to SharePoint
- Integrated with other departments/processes
- Robust Visibility and Reporting
- Either on-premise or SaaS delivery
- Looks & works like familiar MS Office applications

### Comindware Workflow for SharePoint

- Add a graphical mouse-based Workflow Builder to your SharePoint processes
- Automatically generate Tasks and work on Tasks in your familiar Outlook environment
- Get real-time visibility on all team processes and Tasks with graphical reporting tools
- Start instantly – no installations inside SharePoint required

### Comindware Tasks for Outlook

- Receive and work on Comindware Tasks in Outlook

## Comindware Tasks for Outlook

Outlook is the most common work environment for your team. Power it up with Comindware Tasks for Outlook and get Tasks transparently in your familiar Outlook environment, with priorities, deadlines and discussions.

- Keep your team productive working Tasks without switching from Outlook
- Move your workflow forward
- Initiate new workflow processes from Outlook
- Get real-time visibility
- Install in just a few mouse clicks

## Easy to Use

- Graphical Workflow Builder
- Make Changes on-the-fly with no interruption
- No programming or special expertise needed
- Generate Tasks, not just a link back to SharePoint
- Create and modify real-time status reports
- Build business applications quickly
- Start instantly – no installations inside SharePoint

## Simple & Secure

Comindware Tracker is simple enough for anyone to use yet provides enterprise-grade security and scalability. You can set security rules with just a few clicks. Integrate with your Microsoft Active Directory for easy import of users with approved network authentication.

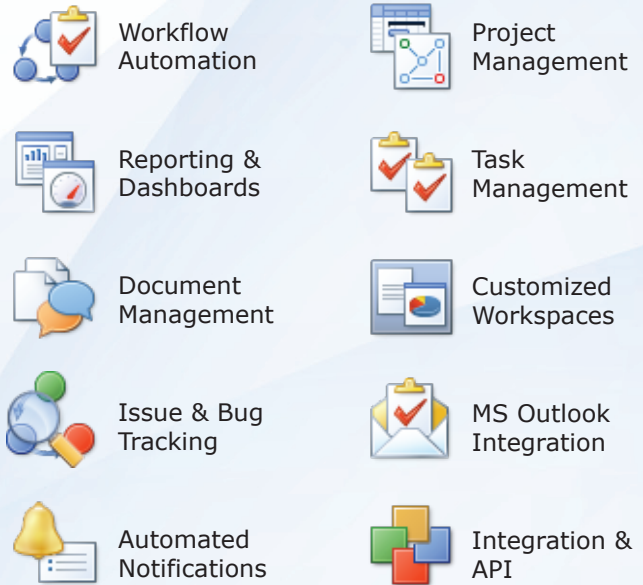

## Reporting & Visibility

Track all processes and Tasks with real-time visibility you can't get in SharePoint and Outlook alone. Compare performance across projects and departments. Reconcile results with budgets. Build custom views and lists, and export data for further analysis.

## Key Benefits

- Maximize your Microsoft investment
- Easily create and change SharePoint Workflows
- Automatically generate Tasks, not just links back to SharePoint
- Get visibility of all team processes and Tasks
- Track team Outlook Tasks
- Collaborate on Outlook Tasks
- Cut hidden costs
- Improve process management and productivity
