

# Comindware Project™

## State of the Art Project Management

Unlike traditional project management tools, Comindware Project™ provides not only professional planning capabilities, but also gives project managers unparalleled project execution and collaboration environment for most productive and predictive work experience ever.

Dramatically simplify project scheduling with Comindware Automated Priority-based planning. All your project plans are created automatically once you assign tasks and define priorities.

Create an initial visual project plan with Comindware WBS (Work Breakdown Structure) chart – with the clean project structure and unlimited task hierarchy. Add more details as you kick off the project.

Always know your real-time project status with Comindware' predictive Real-time Gantt-chart. Your project plan is automatically recalculated if the task is completed before the due date or delayed.

Built on the top of Comindware Team Network, the industry first enterprise social tool designed to efficiently collaborate in the context of work, Comindware Project makes it easy to boost employee engagement with its unparalleled teamwork capabilities.

## Key Features

### ✓ Automatic Priority-based Planning

Drag and drop your tasks in order of priority and get the project plan built automatically

### ✓ Visual WBS

Create a visual project structure for an easier and cleaner planning experience

### ✓ Predictive Real-time Gantt-chart

- Always see your real-time project status – as well as milestones and due dates for timely management decisions
- The project plan is automatically recalculated based on the actual task progress and completion

### ✓ Comindware Team Network

- Team collaboration in the context of Projects
- Project-based and company-wide activity streams
- Rooms to discuss specific matters across or beyond your projects
- Document Management
- Company Directory and Organization Chart
- Awards

### ✓ Work inside MS Outlook

- Stay productive without switching from Outlook
- Run Comindware Project right inside your Outlook environment

### ✓ In the Cloud and On-premise

- Start quickly with Comindware' secure Cloud
- Or get full control with the on-premise installation

# Comindware Project Solutions

## Professional Services

Properly plan your projects and identify hidden opportunities or potential delays in advance so you can deliver projects to your clients on time:

- Set up multi-configurable Timesheets and flexible Reports to accurately present billing information
- Take advantage of Workload management to allocate time and resolve resource conflicts when needed
- Browse the Company Directory and build the right team based on employees' skills
- Use discussion Rooms to collaborate on customer requirements, design proposals or financial statements
- Leverage Document Management accompanied with versioning to keep all the collaterals in a single place

## IT Projects

Eliminate miscommunication that frequently occurs between the IT department and internal customers:

- Predictive real-time Gantt chart allows to get realistic delivery on IT projects
- Intuitive Workload management to allocate scarce resources between never ending projects
- Multi-configurable Timesheets to track time spent on current projects
- Company Directory and discussion Rooms to involve internal customers into collaboration on delivery plans

## Marketing Projects

Marketing projects are challenging to control due to constant changes and the variety of different teams involved. Comindware Project helps to avoid these pitfalls to deliver marketing projects on time:

- Track real-time on each campaign with Timesheets so you can better prioritize activities and budgets
- Determine who is responsible for what and see real-time project status with the predictive Gantt chart
- Use discussion Rooms to collaborate with the product team
- Refer to the Company Directory to instantly find the right team member with the right skills needed
- Solve document mess challenge with the Document Management functionality

## New Product Development

Ensure you no longer face unexpected deadlines or miss open slots in the project schedule so your products and updates are delivered on time and within your budget:

- Skip unreliable manual scheduling with Automated Priority-based Planning
- Use the predictive real-time Gantt chart to control the actual completion date
- Create discussion Rooms to allow multiple teams to launch the product successfully
- Store all product specifications, mock ups, wire frames in a single Document Management system
- Analyze Timesheets for your current projects so you can adjust future project plans accordingly
